Increase usability and value with **LtCrane** control system

LtCrane is easy to use right from the start. Both installation and operation of the system is simple. Whether you are an OEM machine manufacturer, or installing the product as a retrofit solution, **LtCrane** will bring you guaranteed benefits.

LtCrane features:

- Get access to up to 6 crane movements directly from the joystick and two secondary movements by pressing the top button on the joystick.
- The **LtCrane** system is simple to install, easy to use and cost-efficient, which increases operator satisfaction and profitability of operations.
- Comes with dump valve control for enabling / disabling the hydraulic system.
- Movement speeds can be tuned in the field with the Quick Trim potentiometer.
- The detachable system allows for the cabin controls to be installed in multiple tractors which facilitates sharing a single trailer between the tractors.

Configurable parameters (during commissioning):

- Valve selection
- Min & Max current
- Acceleration and deceleration ramps
- Joystick calibration
- Speed balance for Quick Trim
- Error diagnostics
